

PROBLEM STATEMENT

- **Problem Statement : Nutrition Agent**
- In an era where health awareness is growing, individuals increasingly seek personalized nutrition guidance. However, most existing tools provide generic diet plans, lack real-time adaptability, and fail to consider a person's holistic lifestyle, cultural preferences, allergies, and evolving health conditions. Dietitians and nutritionists also face limitations in scaling personalized consultations due to time and resource constraints.
- Generative AI presents an opportunity to solve this through an intelligent, interactive, and adaptive virtual nutrition assistant that can generate dynamic meal plans, recommend smart food swaps, and explain nutritional choices — all tailored to the individual
